

The idea of a Spondal Royal Combo was born out of a focus on high-expectation gun owners. In my desire to delight shooting enthusiasts I practice abundant thinking in order to reset customer expectations. I don't build many guns, but I build them perfect and unique. My quality is fixed but I am flexible on customer design details. My designs are bold but elegant. I am daring in new designs because I trust in my ability.

Africa is a hunting destination hunters world over aspire to. I wanted an African dangerous game cartridge and a sporting gun to make up The Spondal Royal Combo. My passion for big bore and doubles led me to the 500 NE. The effectiveness of the calibre is proven, probably less known is the shooting

friendliness of this straight cased cartridge. A masterpiece of 4 years hand work was finished in the finest engraving by a master engraver from the world famous traditional gun making town of Ferlach in Austria. Regulated with Norma PH 570Gr Woodleigh this gun shoots sub MOA groups.

In my desire to delight shooting enthusiasts I practice abundant thinking in order to reset customer expectations. I don't build many guns, but I build them perfect and unique. My quality is fixed but I am flexible on customer design details. My designs are bold but elegant. I am daring in new designs because I trust in my ability.

Bird and sport shooting is enjoyed by thousands the world over. The Spendal Royal Combo is not a pair of identical guns, rather a combination of guns that will delight future generations of ownership. I chose a 12 gauge shotgun because of its popularity, and side by side because of its classic lines and rich heritage. The shotgun had to compliment the 500 NE in all details with engraving by the same master engraver. I am proud that my partnership with The Powder Keg will ensure that the Combo will be enjoyed by generations of future ownership.
